ONLY ONE NEW CASE OF FEVER

(Continued from First Page.)

some service to the people of Pensacola.

"So far as suspicious cases are concerned, you will have to get this information from Dr. Porter. He receives reports and will give you all of this information."

Dr. Porter Also Busy.

State Health Officer Porter was also a busy man yesterday, but most of his time was consumed in answering telegrams and letters from mayors of small towns, who have persisted in placing their own quarantine regulations in force. In fact all kinds of rumors had been heard by these people, and naturally they wanted information, which Dr. Porter cheerfully furnished.

Suspicious Cases.

There are a few suspicious cases in the city, but Dr. Gutierrez, in reply to the question, that there were no new developed cases. The ones under suspicion are being treated by him and the attending physicians as suspicious cases, and will continue so until later developments. One of these cases is near the corner of Tarragona and Zarragosa streets, and another is on East Romana street, near Tarragona.

The Danesby Case.

The case of Danesby was pronounced by Dr. Gutierrez as yellow fever after two examinations. Danesby had been residing in Marianna for several

THE PEOPLE ALL

In Chorus Cried, Give Us Newbro's Herpicide.

This word of late has been in everyone's mouth, and many are wondering what the word signifies, though no one has yet been found, who will deny that NEWBRO'S HERPICIDE does the work. Well, for the information of thousands of people who like to know all about a good thing, we would say that HERPICIDE means a destroyer or killer of "Herpes." Now "Herpes" is the family name of a disease caused by various vegetable parasites. A similar microbe causes dandruff, itching scalp, and falling hair; this is the microbe that NEWBRO'S HERPICIDE promptly destroys; after which the hair grows. Sold by W. A. D'Alemberte, druggist and apothecary, 121 S. Palafox street, Pensacola, Fla. Send 10c. in stamps for sample to The Herpicide Co., Detroit, Mich.

Pensacola, Fla.

weeks, where he was working in a printing office. On Wednesday, the 28th, he came to Pensacola and was employed in the Burrow printing, where he remained until Saturday, the 27th, when he was taken ill. Dr. Dewberry was called, and had been treating the case, Thursday he called in Dr. Gutierrez for his opinion as to the disease, as it presented suspicious symptoms. Yesterday the expert decided that it was yellow fever, though of a very mild type.

Fumigation and Inspection.

The work of fumigating and inspection is going ahead rapidly. Drs. Kennedy and D'Alemberte yesterday superintended the fumigating of sixty-one residences in the infected district, and they stated last night that by tonight that every house within the infected area would be fumigated. This work is being done by a corps of men under the physicians and is thorough in every respect.

For Public Good.

Reports are being circulated as to the consideration being received by Drs. Kennedy and D'Alemberte for their services in conducting this work, and some have even gone so far as to say that they pay for each day's work is \$50. This is entirely false. The two physicians are making personal sacrifices in order to do this and it is solely for the public good. The remuneration allowed them is barely enough to defray their expenses while going about the city, being only \$5.00 per day. Both gave up a large number of patients and abandoned their practice temporarily to undertake this work when asked to do so.

Bulletin No. 4.

Dr. Porter issued bulletin No. 4 yesterday, which reads as follows: "Executive Office, State Board of Health of Florida, Pensacola, Fla., Sept. 1, 1905.

"Reports of cases of fever, suspicious or confirmed as yellow fever.

"The state health officer requests of the practitioners of medicine of the city of Pensacola that they will make immediate report to his office of all suspicious cases of fever which may occur in their practice as well as all confirmed cases of yellow fever.

"This information is necessary that a well directed management may successfully cope with the disease looking for its eradication from different foci.

"**J. Y. PORTER,**
"State Health Officer of Florida."

Will Not Quarantine.

The district in which George Danesby, the new patient, resides, which is now known as a sub-foci, will not be quarantined. The place in which several of the cases originated is the original foci, and of course is under quarantine restrictions. The home of Mr. Danesby will be fumigated and screened in order to kill and keep out mosquitoes.

DEATH YESTERDAY OF MRS. T. E. ROBERTS.

Mrs. T. E. Roberts, a most estimable lady, passed away yesterday at her home, after an illness extending over a period of several weeks. She was surrounded by friends and relatives when death occurred, and many persons will learn of her death with much regret.

Mrs. Roberts has been a resident of Pensacola for nearly a quarter of a century, and has been residing with relatives. She was a devoted Christian and is the widow of the Rev. Asa Roberts, who died in Mobile.

Death occurred about 10 o'clock, and during the day there were many to call at the family home who extended their sympathies to the bereaved family.

The funeral services will occur this afternoon at 4 o'clock at Christ's church. The interment will occur in St. John's cemetery.

The Big Store has just received a big shipment of canopy mosquito bars, 80 inch \$1.50; 90 inch, \$1.75. Phone 62, dry goods department. Wm. Johnson & Son.

DR. GUTIERAS PAID VISIT TO DR. DIAZ YESTERDAY.

Although he was very busy yesterday Dr. John Gutierrez, paid a visit to Dr. A. Diaz, the official representative at this port of the Mexican government.

The two gentlemen spent some time in an informal talk, Dr. Diaz being Mexican consul, and while nothing of interest transpired it showed the friendly feeling existing between the Cuban and Mexican governments.

DAYS OF DIZZINESS

Come to Hundreds of Pensacola People.

There are days of dizziness; Spells of headache, sideache, backache; Sometimes rheumatic pains; Often urinary disorders. All tell you plainly the kidneys are sick.

Doan's Kidney Pills cure all kidney ills.

Here is proof in Pensacola: Mrs. M. White, of West Zarragosa street, says: "Any remedy that will make a cure as promptly and thoroughly as Doan's Kidney Pills did in my case is well worthy of the highest recommendation. I was troubled with my kidneys for some time, indicated by severe pains in my back and sides. Sometimes it was a dull aching and at other times sharp twinges. I also had dizziness and severe headaches and an annoying difficulty with the kidneys. I happened to read an advertisement in the papers about Doan's Kidney Pills and procured a box at Sidney Kahn's drug store, No. 9 South Palafox Street. I felt relieved after taking a few doses and before I finished the third box I was completely cured. I am now perfectly well and healthy as far as my kidneys are concerned."

For sale by all dealers. Price 50 cents. Foster-Milburn Co., Buffalo, N. Y., sole agents for the United States.

Remember the name—Doan's—and take no other.

VAL. H. WRIGHT SUDDENLY EXPIRES

Died of Heart Disease While on a
Visit to Friends in Richmond,
Virginia.

Val. H. Wright a prominent young business man of this city, and a member of the firm of the W. B. Wright Co., expired suddenly Thursday afternoon in Richmond, Va., to which place he had gone some time since on a visit.

Death was due to heart disease and relatives here were immediately notified by wire of the same.

Mr. Wright was popular among all with whom he came in contact. He was worshipful master of Escambia Lodge, No. 15, F. & A. M., and had held that high office in masonic circles for nearly a year.

The deceased had not been ill for any length of time, though his health before his departure was not good, and that was one of the reasons that he left here for Richmond.

W. B. Wright, brother of the deceased, left here yesterday for Richmond to accompany the remains to Pensacola, where the interment will be made by the Masonic lodge.

Mr. Wright leaves a large number of relatives and a host of friends to mourn his loss. As yet the date and hour of the funeral has not been announced.

BRAVE DECATUR.

The Story of His Pledge Attack on a
Tripolitan Vessel.

Gardner W. Allen in his book, "Our Navy and the Barbary Corsairs," retells the old story of how Commodore Stephen Decatur, then a Lieutenant in the United States navy, attacked a Tripolitan vessel. The incident occurred in 1804, when Preble was lying off Tripoli. Young Decatur had been told that the captain of this vessel had treacherously murdered his brother, John Decatur, after he had surrendered to him. Mr. Allen writes: "He ran alongside and at once boarded with Macdonough and the remnant of his crew. Decatur singled out the captain, a man of great size and strength, and attacked him furiously. The Tripolitan made a thrust with his boarding pike, and in attempting to parry the blow Decatur's cutlass was broken off at the hilt, leaving him for the moment unarmed. Another thrust of the pike wounded him in the arm. Decatur seized the weapon, wrenched it away and grappled with his antagonist. After a short struggle they fell to the deck, with Decatur on top.

"Meanwhile the two crews were fighting furiously about their leaders, and a Tripolitan aimed a blow at Decatur's head with his scimitar, when a seaman named Daniel Frazier, having both arms disabled by wounds, interposed his head and received the blow, which laid open the scalp. The Tripolitan captain, being more powerful than Decatur, soon turned him underneath and, holding him down with his left hand, drew a knife and was about to plunge it into his breast.

"Decatur seized the uplifted arm with his left hand, while he managed to get his right into his pocket, where he had a pistol. Giving it the proper direction, he fired through the pocket. The giant relaxed his hold and fell dead. Having lost seventeen killed, including their leader, the seven surviving Tripolitans, four of whom were wounded, soon gave up the fight."

The Art of Expression.

A discontented woman uttered this complaint the other day: "If I only knew how to express myself!" she said. "I know so many things that I cannot possibly convey to other people." She did not dream that the little thing for which she yearned—namely, the art of expression—is the essential attribute of the loftiest genius in letters or the fine arts.—New York Telegram.

Jewels That Live.

Beauty, money and fame cannot be carried beyond the horizon line that shuts around this cradle of a world, but love, joy, peace, gentleness, faith, meekness, temperance, are jewels which by their very nature will survive the transit of the world invisible.—F. E. Willard.

At a Bargain.

Mrs. Gad A. Boutt—Dear me! I have been to about ten stores and am all used up. Mr. B.—Oh, no; you're only a little shopworn.—Washington Life.

Moscow is situated almost in the geometrical center of European Russia.

KILL ALL MOSQUITOES.

New Orleans, Aug. 24, 1905.

To the General Public:

As the public has shown a commendable desire to annihilate the mosquito, which is the only means by which yellow fever is communicated to persons, and as I have received numerous requests from many sources to appoint a general fumigation day, I herewith suggest, Saturday, Aug. 26, and Sunday, Aug. 27, from two hours of 10 a. m. to 12 m.

Realizing that if the mosquito is to be destroyed the work of fumigation must be well done, we have formulated the following instructions for the guidance of the PUBLIC:

1. Remove all ornaments of metal, such as brass, copper, silver and gilt from the room that is to be fumigated. All objects of a metallic nature which can not be removed can be protected by covering the object tightly with paper, or with a thin coating of vaseline supplied with a brush.
2. Remove from the room to be fumigated all fabric material after thoroughly shaking. Open all drawers and doors of furniture and closets.
3. The room should be closed and made as tight as possible by stopping all openings, in chimney, floor, walls, keyholes and cracks near windows and doors.
4. Crevices can be closed by pasting strips of paper (old newspapers) over them with a paste made of flour.
5. After the room has been prepared roll sulphur or flowers of sulphur should be burned in the room, one pound to every 500 cubic feet of air space, or about six pounds to an ordinary room.
6. The sulphur should be placed in an iron pot, flat skillet preferred, and this placed on bricks in a tub or other convenient water receptacle with about one inch of water in the bottom. This is a precaution which must be taken to guard against accidents, as the sulphur is liable to boil over and set fire to the house.
7. The sulphur is readily ignited by sprinkling alcohol over it and lighting it.
8. The apartment should be kept closed for two hours, and then opened up and well ventilated.

Note—To find the cubic contents of the room, multiply the length of the room by the width, and this total by the height, and to find the amount of sulphur necessary to fumigate the room divide the cubic contents by 500, and the result will be the amount of sulphur required in pounds.

Take, for example, a room 15 feet long, 10 feet wide and 10 feet high, we would multiply 15x10x10, equals 1500 cubic feet. Divide this by 500 and you will have the amount of sulphur required, viz: 3 pounds.

A. L. WHITE, Surgeon P. H. and M. H. S.
J. H. METZ, M. D.,
Professor of Chemistry and Medical Jurisprudence, Medical Department, Tulane University of Louisiana.

I entirely concur in the above recommendation.
JUAN GUTIERAS, President of the Board of Infectious Diseases, Havana, Cuba.

Those who prefer to use pyrethrum (insect powder) in place of sulphur can do so by burning one pound of pyrethrum to every 1000 cubic feet of air space.

The powder should be put in a shallow pan, sprinkled with a few drops of alcohol and ignited, or a redhot coal may be placed in the center of the powder.

The same precautions in the sealing of the room to be fumigated should be observed as in the burning of sulphur.

Great care should be exercised to sweep the room after the fumigation, and the mosquitoes swept up should be thrown into a fire.

To the Citizens of New Orleans:

In conformity with the urgent request of the Marine Hospital surgeon in command, and on behalf of the volunteer ward organization, your representatives, I earnestly recommend a general fumigation of houses, stores, office buildings, factories, and every harboring place of the mosquito on Saturday, Aug. 26, so generally adopted as a half holiday, and on Sunday, the 27th, in the case of those who find that a more convenient day.

Your attention is called to the directions issued by Dr. J. H. White, indorsed by Dr. John Gutierrez.

Free sulphur will be furnished from this office to those unable to buy it. This sulphur will be delivered to the ward organizations on a requisition signed by the president or chairman, and these officers are urged to send for their supplies as soon as possible, and to advertise the place of its distribution. Respectfully,

BEVERLEY WARNER, General Superintendent.

**We carry a full line of sulphur and
